

# WARNING FROM THE KING OF ELECTRICAL WORLD

I am the undisputed king of the electrical world. I am present everywhere. I am omni present & most powerful incarnation of the GOD on Earth. My one signal can start or stop Lights, Fans, ACs, Motors & even Trains. I control use of more than Rs 5 lakh crores worth of electricity per year directly and cause expenditure of Lakhs of Crores of rupees indirectly.

Despite my huge importance ,some people do not even understand me & tend to neglect me. They do not use me to switch-off appliances and gadgets. They want to control every thing with remote- lazy and careless people. every time they do so, I surely & severely punish them by way of increased electricity bills, low voltage, power cuts and erratic supply. I do not forgive. I am not for forgiveness. Let everyone understand this by heart. I am after all, the Emperor of United Kingdom of Electricals- my name is "KING SWITCH".

Use me or be ready for:

- Monetary loss
  - Power cuts affecting comfort and working time
  - Electric shocks, Break downs and maintenance problems and so on .....
- Including global warming/social problems

**Let's press the 'King Switch' to the 'Off' position  
as delightfully as for the 'On' position  
and serve the Self, Organisation and Nation (SON)**
